Compliance with ASTM B221M-07

We hereby certify that the material covered by this report has been verified or tested according to the relevant standard sampling method or the requirements of any specifications or requirements described herein, and that sample representative of the material met the composition limits and had the mechanical properties shown. Also, note that mercury is not a normal constituent in aluminum alloys. Neither mercury nor any of its compounds are used in the manufacture of our extrusion. This certificate conforms to 1.1, EN 10304.
